MIPP Software/Analysis meeting

Pass 4b

Holger Meyer

Fermilab

6/20/08

Outline

- Pass 4b reconstruction of data

    – tagged release R08.07.15

    – dst file location

MIPP

🎇 Fermilab

Pass 4b

- Processing all runs (`runlist-round3-pass4.txt`) with `bpPass4b_Job.xml` job description

    - `gridSubmitPass -R R08.07.15_Linux2.6 -p pass4b -s -f runlist-round3-pass4.txt`

        - each subrun is submitted separately

- Several minor problems with submitting jobs have been resolved

    - Adapt to grid software updates, etc.

- All NuMI runs are done, other runs are going to be done soon.
  DST files are at

    - /pnfs/e907/reco3/FNAL/pass4b/*nn*/mippHist*nnnnn*.*ss*.pass4b.root

- I plan to remove the pass4a DSTs from e907ana disks to make room for pass4b DSTs

    - Let me know if you want to keep using the old DSTs

        - I don't see why you would want to.
